Pi School Workshops

September 15-16, 2017
@ Pi6
via Indonesia 23, Rome

We designed these workshops to give you a snapshot of some topics Pi School programmes will focus on: we will have a series of talks and short classes specially designed for full blood and hardcore developers. Allow us to warn all others who are welcomed to sneak in and yet won't understand a word!

Along side with these talks we will have a long list of other programmes, workshops and master classes designed to raise the attention of designers, advertisers, entrepreneurs, strategist and anyone else hungry for knowledge.
